SPRING 2026

## THIS SUMMER GET THE BEST FOR YOUR KUBOTA

- Keep your tractor working at full potential [p2](#)
  - Bale for less - 0% financing [p4](#)
- Essential safety tips for farm machinery [p7](#)
- Mower maintenance - performing at its best [p8](#)

# GET THE BEST FROM YOUR KUBOTA THIS SPRING & SUMMER.

## When the season begins, your Kubota needs to be ready to work as hard as you do.

As workloads build through spring and into summer, your Kubota machine becomes one of your most valuable tools. Whether you're tackling harvest or ensuring a consistent finish on turf, reliability is everything.

Kubota equipment is engineered to perform, but like any high-quality machine, it delivers its best when properly maintained. Taking a proactive approach to seasonal servicing helps ensure you're ready for the demands ahead.

When the pressure is on, you need equipment you can rely on. With the right preparation and support, your Kubota is ready for the season ahead.

### BUY GENUINE KUBOTA PARTS

Genuine parts are specified for Kubota machines, made to help maintain performance, reduce wear, and enhance long-term reliability.

**BUY ONLINE 24/7:  
UK.TERRAKO.COM**

### STAY AHEAD – BOOK A SERVICE

While daily and weekly checks are essential, a professional service provides added confidence. As your authorised Kubota dealer, we're here to support you throughout the season. From routine servicing to supplying genuine parts, our team is focused on keeping your machine operational when you need it most.

## FOR FARMERS: KEEP YOUR TRACTOR WORKING AT FULL POTENTIAL

Downtime isn't just inconvenient; it can impact the entire operation. That's why a pre-season check is essential before workloads ramp up.

### FLUIDS AND FILTERS: PROTECTING PERFORMANCE

Your tractor's engine and hydraulic systems rely on clean, high-quality fluids to perform under pressure. Before peak season, make sure to:

- Replace engine oil and genuine Kubota filters
- Check and top up with Kubota hydraulic and transmission fluids
- Change fuel filters - order a Kubota service kit with all the filters you need.

### HYDRAULICS, PTO AND LINKAGES

With implements in constant use, these systems need to be in optimal condition:

- Inspect hydraulic hoses and couplings
- Check PTO shafts and safety guards
- Grease linkage points and pivot areas

### COOLING AND DAILY CHECKS

Long hours and warmer conditions increase engine strain:

- Keep radiators and screens clear of debris
- Check coolant levels and condition
- Carry out quick daily walkaround check

A well-maintained tractor isn't just more reliable, it's also more efficient, more productive and better to operate.

## FOR GROUNDSMEN: TRACTORS & MOWERS THAT DELIVER THE FINISH

For grounds professionals, results matter just as much as reliability. Kubota's compact tractors and ride-on mowers are engineered for precision, but maintaining that standard takes preparation.

### MOWER DECK SETUP: CUT QUALITY COUNTS.

Sharp, well-maintained blades finish, reduce strain on the machine and improve efficiency. For a consistent, high-quality cut:

- Sharpen or replace blades for a clean finish
- Check blade balance to reduce vibration
- Inspect and replace belts, spindles and pulleys
- Keep the deck clean underneath

### AIRFLOW AND CLEAN RUNNING

Grass and dust build up quickly during peak season:

- Clean or replace air filters regularly with genuine Kubota filters
- Clear radiator screens and vents
- Monitor airflow around engine components

### COMPACT TRACTOR VERSATILITY

If you're using a compact tractor across multiple tasks:

- Check PTO engagement and operation
- Inspect hydraulics when changing attachments
- Keep all moving parts properly lubricated - top up with Kubota hydraulic and transmission fluids

### PROTECTING TURF AND WORKING SURFACES

- Maintain correct tyre pressures
- Check for wear that could affect performance
- Ensure tyres are suited to the job in hand

For groundsmen, preparation is what turns a good result into a great one.

# BALE FOR LESS!

**ON ALL  
KUBOTA  
CROP BALING  
PRODUCTS**

The Kubota range of crop baling products has been developed in partnership with Tama – experts in baling technology for maximum protection and consistent baling performance.

The Kubota crop baling products – baling net, twine and stretch wrap – offer the same uncompromising performance, quality and reliability you can expect from Kubota tractors and implements.\*

All products must have been delivered, invoiced and the finance deal concluded prior to 30th September 2026.

**ORDER TODAY:**

\*Terms and Conditions apply. See website for details.

# ORDER THE PARTS YOU NEED 24/7.

- Search for genuine Kubota parts by model or part number
- Check stock levels at your local Kubota dealer
- Order online with a safe and secure checkout
- Click and Collect / delivery service from your local Kubota dealer

TO ORDER GENUINE KUBOTA PARTS, CREATE YOUR FREE ACCOUNT NOW:

## COOL AND PROTECT WITH KUBOTA PROTEKT.

Kubota Protekt Coolant is recommended for all cooling systems of Kubota machines, providing protection against corrosion, freezing and overheating - helping you reduce maintenance costs.

ORDER TODAY:

# BE SAFE. BE SEEN.

Stay safe, comfortable,  
and job-site ready with  
Kubota PPE and Workwear.

## KUBOTA PPE

Kubota's range of high visibility PPE includes reflective overalls & vests, protective gloves, safety footwear, hard hats, eye/ear protection & respiratory masks.

## KUBOTA WORKWEAR

Ask about our range of Kubota summer workwear, clothing and accessories. See the full range: [shop.kubota-eu.com](http://shop.kubota-eu.com)

# WORK SMART STAY SAFE!

## ESSENTIAL SAFETY TIPS FOR FARM MACHINERY

Machinery causes serious injuries and deaths on farms every year. Know the risks. Take precautions. Stay safe – protect yourself and others.

### BEFORE YOU START

- Always read and follow the operator's manual
- Conduct a pre-use inspection before starting
- Stay alert and avoid distractions while working.
- Use proper signals/communication when working with others
- Be aware of your surroundings – watch for obstacles and uneven ground
- Report and fix any faults or hazards immediately

### STOP SAFELY BEFORE YOU CHECK / FIX

1. Fully apply the handbrake
2. Put all controls in neutral
3. Stop the engine
4. Remove the key from ignition

### OPERATE ONLY IF YOUR TRAINED / AUTHORISED

- Ensure PTO guards/restraining chains are in place/good condition
- Repair/replace faulty guards
- Check brakes are working and interlocked
- Put your seatbelt on!
- Only start the tractor from the driver's seat
- Use the correct shaft and engine speed

### STAY CLEAR OF MOVING PARTS

- Never step across rotating power shafts – walk around the machine
- Wear close-fitting clothes, remove headphones and scarves, and tie back long hair

### BE AWARE OF OTHER HAZARDS

- Check hitches and linkages for wear or damage
- Use hydraulic brakes on heavy machinery
- Watch overhead power lines when tipping trailers

### BE AWARE OF OTHER HAZARDS

- Check hitches and linkages for wear or damage
- Use hydraulic brakes on heavy machinery
- Watch overhead power lines when tipping trailers

### STAY CONNECTED

- Carry a mobile phone (don't leave in the cab)
- Use What3words for precise location sharing
- Program emergency contacts and ICE information into your phone

FARM SAFETY FOUNDATION

Kubota UK supports The Farm Safety Foundation, an award-winning charity raising awareness of farm safety and farmers' mental wellbeing. Through campaigns like Farm Safety Week 20-24 July and Mind Your Head, it tackles risk-taking and stigma, helping the next generation farm safely and live well.

# Rock Fall®

## SAFETY FOOTWEAR

Rock Fall Safety Footwear, in partnership with Kubota, delivers UK-engineered high-performance protection and all-day comfort in the toughest environments.

ORDER FROM YOUR KUBOTA DEALER TODAY:

# ARE YOU CUTTING IT?

Keep your equipment performing at its best during the busiest seasons with genuine, high-quality replacement parts you can rely on.

From V-belts and deck belts to mower blades, bearings and bushes, Kubota parts are designed for durability, strength, and optimum machine performance—helping you stay productive and avoid unnecessary downtime.

## KUBOTA GENUINE V-BELTS & DECK BELTS

- Kubota belts are manufactured to the highest standards
- High tensile strength and excellent shock load resistance
- Superior resistance to wear and tear
- Strong protection against oil, heat, and cracking
- High durability under repeated reverse flexing
- Reduced slippage during clutch engagement

**ORDER TODAY**

## BLADE MAINTENANCE

Keep your mower blades in top condition for the best performance and finish. Our workshop can inspect, sharpen, or replace your blades as needed, or supply genuine high-performance replacements for your Kubota mower deck.

## Why fit Kubota genuine replacement blades?

- High-grade steel for strength and durability
- Precision-engineered for a cleaner cut
- Longer life, less downtime
- Perfect fit, reliable performance
- Helps restore performance when the original blade is worn or damaged.
